

August 25, 2014

UN Secretary General, the Hon. Ban Ki-moon  
United Nations Headquarters  
New York, NY 10017

Excellency,

I am writing in to you regarding a possible gang stalking and psychotronics weapon usage that may pose international security threat which I would kindly like to seek for your help. I have been gang stalked for roughly a year from August 2014 till now, in which some sort of psychotronics weapon has been used in harassing my brain, with an attempt of using voices and brain massage therapy technique to distract, misdirect, confuse all my decision and judgement, and make me lost my thoughts by blocking the interaction of my right and left frontal lobes of my brain when required. The people around me, and the perpetrators, seemed to have this device in their head, and are able to listen to every of my thoughts. I previously have no knowledge on the existence of such weapons and stalking techniques, until I did some research on the internet. My perpetrators seemed to have familiar voice of my secondary school classmates, of who I have lost contact with for many years. Surprisingly, United Nations and Laju has always been mentioned by the perpetrators and people, even when I am in Paris, hence, prompting me to write this letter to seek for your assistance.

I am a graduate from the National University of Singapore (NUS), Institute of Systems Science, from January 2012 to August 2013, with a Master of Technology in Knowledge Engineering. During my study at NUS, my mother, unfortunately, was diagnosed with Radiation Necrosis by the National University of Hospital in February 2012, and undergoes a major brain surgery. She was inflicted with Hospital Acquired Pneumonia within a week after the transfer from Saint Luke Hospital to Singapore Christian Home in mid 2012. I am always suspicious of this transfer procedure and deemed it to be medical mishap until recent research shows me that it was hospital acquired pneumonia. My mother passed away in Saint Joseph Hospice shortly after I graduated from NUS in 2013, due to pneumonia.

During my mother stay in the hospice, as well as during her funeral, I do bring up about my suspicion of the transfer to my family, as well as the nuns of Saint Joseph Hospital during their visit to my mother funeral. The nuns do try to confirm with me Saint Luke Hospital by repeating themselves. I started seeing illusion and soon, being gang stalked, and was hinted to visit the United Nation in Paris, under some direction by some of the people, who seemingly tried to help me to break out of the stalking. Having no knowledge of the existence of psychotronics device in my brain and not knowing what to do, I do what was directed and arrived at Paris in September 2013 using my mother's CPF claim. I stayed in the Loft at 70 Rue Julien Lacroix, and was surprisingly "interrogated" by people who talk to me through high voices outside my room, claiming that they are United Nation Intelligence Group and are investigating my mother's case. They have not shown me any evidences of investigation permit and etc., but followed me whenever I go. I was later made known of the existence of this device in my brain and that they can see what I see, heard what I think. If this device failed to distract me, external voices from kids and people will be used to distract me.

I was later asked to fly back to Singapore in November 2013 by these people, who claim that they have enough evidence to call for a secret court, and was asked to stay in Changi Airport for my security. I was tricked to spend all my money in Changi so that they can meet me and save me which they never did, all through hypnoism approach using this device. I sustained myself by working as a housekeeping supervisor at Campaign and Waiter at the Imperial Treasure Restaurant, till May 2014, I am able to

break portion of the control and went back home. I did some research on the internet for similar cases I faced, which brings me to know about Gang Stalking and Psychotronics weapon and warfare, including the development of DARPA Brain Implant Project.

The device, as I tried to figure out, seemed to be some form of transceiver that can transmit though, and receive signal from the perpetuator. The perpetuator can transmit voices, either by normal communication with me, or by low volume repeatably voice to hypnotize my brain or misdirect my thinking. Thoughts are read out by them as I think, and then try to direct me to the wrong side using words like “lose, lose again”, or right side which then will eventually become wrong. The device seemed to be able to move, sent signal to make me itch, see illusion, muscle pain and toothache. Given its movement capabilities, it is able to block or simulate certain portion of the brain, such as the back brain to make me feel sleepy, the interaction between left frontal and right frontal lobes to forget what I thought. It has the ability to simulate feelings including fear, lack of interest, distract thoughts, and cause pain. It shares the weakness listening to musics due to frequency distraction, being angry and focus, and merely just ignore and treat every simulation as fake. If all else fails, external voices will come to play, as well as the use of low frequency signal and hypnoism to induce happiness and seriousness. External events, lias with the fake information they give me, is used to make me believe that what they said are real.

A lot of attempts were made to deprive me to expose this device, including information confusion, misdirection, fear and lack of interest simulation and etc. A lot of things I am still unable to figure out why as they don't make sense, including the fact that many people seemed to have this device in their head, from Singapore to Paris, and some act as I think to confuse me. May I know is this some form of counter terrorism approach? But why does it involve internationally, sacrifice human rights, and yet no one is bringing this matter up, contrary to Snowden's case. And more importantly, why is it exposed like that? I know they sound insane, but I think I can record down some of the external voices. Everything makes no sense, so it acts like a cover, but they all sum up to have severe consequences.

Mr. secretary general, I would kindly like to seek for your help and assistance regarding this matter as stated above, especially when it involves international and United Nations. I am happy to provide you with further information as required.

Sincerely,  
Eric Goh Ming Hui,  
Mtech(KE), MBA(Ex), GDip(Mech), BS
